Dear Customer,

We have added a note to this pattern, to clarify how the panels were joined:

On Model shown, construction was slightly different and created an awkward join at the back. To correct this and make the finished garment symmetrical, both front and back, the construction was modified to 2 separate panels. Therefore your finished poncho will not look exactly as shown, but will be easier to construct and to wear.

Patterns have been changed from August 7, 2017.
